

REFER WITHIN 24H SUSPECTED UNCOMPLICATED MALARIA

PATIENT

Age: 28 years
State / LGA: Lagos

Sex: female
Weight: 62 kg

PRESENTING FINDINGS

- Fever for 2 day(s)
- Malaria RDT: positive

TRIAGE DECISION**REFER WITHIN 24H**

Patient has a positive malaria test suggesting uncomplicated malaria, but resides in Lagos where Lassa fever is actively circulating; therefore referral within 24 hours is warranted for VHF evaluation while managing malaria.

SUSPECTED CONDITION

- Uncomplicated malaria (*high*)
- Lassa fever (*moderate*)
- Cholera (*low*)

ADVISED ACTIONS

- Give first-line oral antimalarial
- Advise the patient to return if fever persists beyond 3 days or worsens
- Isolate the patient and refer to a Lassa fever treatment center for evaluation
- Ensure adequate hydration and monitor for danger signs

OUTBREAK CONTEXT

- Lassa Fever — Lagos (live report, 2026-09-06)
- Cholera — Lagos (NCDC Cholera Situation Report, Week 9, 2025, p.6 (older surveillance))
